IN THE CLAIMS

Please substitute claims 1-16 with the following:

- 1. (Original) A cooking appliance, comprising:
- a pot having an opening;
- a handle hingedly attached to the pot, the handle having a lowered position and a raised position;
 - a lid configured to fit on the pot to cover the opening;
- a gasket, wherein the gasket is positioned between the pot and the lid when the lid is placed on the pot; and
 - a latch hingedly attached to the pot, wherein:

the latch has a locked position and an unlocked position;

when the handle is in the lowered position, the latch is in the unlocked position and the lid is removable from the pot; and

when the handle is in the raised position, the latch is in the locked position and the lid is sealed onto the pot.

- 2. (Original) The cooking appliance of claim 1, wherein the handle engages the latch when the handle is in the raised position.
- 3. (Original) The cooking appliance of claim 1, wherein the handle has two ends and each of the ends is hingedly attached to the pot near the opening.
- 4. (Original) The cooking appliance of claim 1, wherein the pot comprises an electric heating unit.

- 5. (Original) The cooking appliance of claim 4, further comprising: an electric cord to supply the heat to the pot; and a cavity in the pot to store the electric cord.
- 6. (Original) The cooking appliance of claim 1, wherein the gasket is attached to the lid.
- 7. (Original) The cooking appliance of claim 1, wherein the gasket is attached to the pot.
- 8. (Original) The cooking appliance of claim 1, further comprising:
 a second handle hingedly attached to the pot, the second handle having a lowered
 position and a raised position; and

a second latch hingedly attached to the pot, wherein:

the second latch has a locked position and an unlocked position;

when the second handle is in the lowered position, the second latch is in the unlocked position and the lid is removable from the pot; and

when the second handle is in the raised position, the second latch is in the locked position and the lid is sealed onto the pot.

9. (Original) A sealing apparatus for a slow cooker having a heating vessel with an opening and a lid configured to fit on the heating vessel to cover the opening, the sealing apparatus comprising:

a handle hingedly attached to the heating vessel, the handle having a lowered position and a raised position;

a gasket, wherein the gasket is positioned between the heating vessel and the lid when the lid is placed on the heating vessel; and

a latch hingedly attached to the heating vessel, wherein:

the latch has a locked position and an unlocked position;

when the handle is in the lowered position, the latch is in the unlocked position and the lid is removable from the heating vessel; and

when the handle is in the raised position, the latch is in the locked position and the lid is sealed onto the heating vessel.

- 10. (Original) The sealing apparatus of claim 9, wherein the handle engages the latch when the handle is in the raised position.
- 11. (Original) The sealing apparatus of claim 9, wherein the handle has two ends and each of the ends is hingedly attached to the heating vessel near the opening.
- 12. (Original) The sealing apparatus of claim 9, wherein the gasket is attached to the lid.
- 13. (Original) The sealing apparatus of claim 9, wherein the gasket is attached to the heating vessel.

14. (Original) The sealing apparatus of claim 9, further comprising:

a second handle hingedly attached to the heating vessel, the second handle having a lowered position and a raised position; and

a second latch hingedly attached to the heating vessel, wherein:

the second latch has a locked position and an unlocked position;

when the second handle is in the lowered position, the second latch is in the unlocked position and the lid is removable from the heating vessel; and

when the second handle is in the raised position, the second latch is in the locked position and the lid is sealed onto the heating vessel.

- 15. (Original) A method for sealing a lid onto a pot, comprising the steps of: placing a gasket between the lid and the pot; raising a handle hingedly attached to the pot; and engaging a latch attached to the pot, wherein the latch seals the lid onto the pot.
- 16. (Original) The method of claim 15, further comprising the steps of: raising a second handle hingedly attached to the pot; and engaging a second latch attached to the pot.
